

Arshpreet Singh Esher

📍 Mohali, Punjab ✉ arshpreet.singh.dev@gmail.com ☎ +91 6280938771 in arshpreet-singh-mern

Summary

Backend-focused **Software Engineer** with 1+ year of experience designing, building, and scaling **Node.js** microservices and RESTful APIs for high-traffic ride-hailing platforms. Proficient in **JavaScript**, **MongoDB**, **MySQL**, **Express.js**, and third-party payment integrations (Stripe, Square). Hands-on experience with **asynchronous workflows**, **real-time systems** (Socket.io), **Docker**, and **Git**-based CI workflows. Promoted from trainee to full-time engineer within 9 months. Seeking backend or full-stack software engineering roles in product-driven, high-scale environments.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Backend: Node.js, Express.js, REST API Design, Microservices, WebSockets, Socket.io

Frontend: React.js, Next.js, Redux, AngularJS

Databases: MongoDB, Mongoose, MySQL

Payment & APIs: Payment Gateways, Wallet Systems, SMS Gateway, Push Notifications, Google Maps API

Tools & DevOps: Git, GitHub, Docker, Postman, npm, Agile/Scrum

Work Experience

Associate Software Engineer

Mohali, Punjab

JungleWorks

April 2026 – Present

- Designed and optimized **Node.js** backend services for ride-hailing workflows including ride lifecycle management, dynamic fare computation, and automated payout systems, reducing average API response latency by ~30%.
- Built and integrated **payment gateway** solutions using **Stripe** and **Square** with idempotent REST APIs and robust error handling, supporting **10,000+ monthly transactions** with zero duplicate-charge incidents.
- Engineered **asynchronous processing pipelines** for push notifications, job scheduling, and subscription management using event-driven architecture, improving overall system reliability by **25%**.
- Resolved **50+ production bugs** related to service availability, timezone edge cases, vehicle allocation logic, and geospatial map-view rendering across distributed microservices.
- Collaborated cross-functionally with product and QA teams following **Agile/Scrum** methodology to deliver features on schedule.

Associate Software Developer Trainee

Mohali, Punjab

JungleWorks

July 2025 – April 2026

- Developed and enhanced **Node.js** REST APIs for ride booking, fare calculation, and driver payout workflows, implementing city-level business logic serving **5,000+ rides per month**.
- Integrated third-party services including **SMS gateway**, **wallet recharge APIs**, and automated **email/push notification** flows using async event handling, achieving **99%+ delivery rate**.
- Fixed **30+ critical bugs** across availability scheduling, subscription management, timezone handling, and vehicle-assignment modules, reducing the open issue backlog by **40%**.
- Maintained clean, modular **JavaScript** codebases with consistent **Git** commit hygiene across feature and hotfix branches.

MERN Stack Developer Intern

Mohali, Punjab

SDNA Tech

January 2025 – July 2025

- Built full-stack web applications using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) across 3 client-facing products, contributing to both frontend UI and backend API layers.
- Designed and implemented **10+ RESTful API** endpoints with input validation, error handling, and role-

based access control, achieving 100% endpoint test coverage via **Postman**.

- Participated in **5+ weekly code reviews**, enforcing coding standards and reducing PR merge conflicts by 20%.
- Followed **Agile** development practices including sprint planning, daily standups, and iterative delivery.

Projects

Ride Hailing White Labeling Service

[Live Demo](#) 

- Architected a **scheduled ride booking** system with real-time driver matching, precise pickup-time selection, and automated backend scheduling logic, reducing manual booking errors by **90%**.
- Integrated **Google Maps APIs** for live address autocomplete, route calculation, and pickup/drop-off geolocation mapping, serving **1,000+ bookings** in beta.
- **Technologies:** Next.js, Node.js, REST APIs, Google Maps API, Stripe, Square — full-stack payment and booking workflow.

Women At Workforce – Job Portal

[Live Project](#) 

- Developed a full-stack **MERN** job portal connecting women with employment opportunities; onboarded **200+ users** at launch with employer and candidate portals.
- Implemented **JWT-based authentication**, role-based access control (RBAC), **Redux** state management, and real-time job-alert notifications.
- **Technologies:** React.js, Node.js, Express.js, Redux, MongoDB, REST API, JWT.

Real-Time Chat Application

[GitHub Repo](#) 

- Built a **real-time** bidirectional chat application using **Socket.io** WebSockets supporting **100+ concurrent users** with persistent chat history stored in **MongoDB**.
- Implemented secure **user authentication** with bcrypt password hashing, session management, and protected routes.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS, REST API.

Education

Rayat Bahra University, Mohali

2021 – 2025

B.Tech in Computer Science and Engineering

DAV Sr. Sec. School

2019 – 2021

12th — Non-Medical

St. Xavier's High School

2018

10th — Science (ICSE Board)
